SDSL broadband

Quality broadband for the modern business

SDSL broadband

Frontier Voice and Data provides always-on SDSL broadband ideal for businesses where Internet connectivity is business critical.

An SDSL (Symmetric Digital Subscriber Line) broadband package provides the same upstream and downstream speeds.

SDSL is ideal for SMEs who need a better quality of broadband but without the cost or high performance of a leased line.

SDSL is suitable for more demanding uses such as data transfer, video traffic, e-commerce packages, IP telephony, software as a service, remote working and connecting multiple sites using a VPN.

Our SDSL packages come with an Enhanced Care package as standard and with service guarantees including a one-day service level agreement.

Key features

- Maximum contention ratio 10:1
- Upload and download speeds of up to 512 / 1024 / 2048 Kb/s
- Enhanced Care with a 1 working day clear time guarantee
- Multiple static IP addresses
- Dedicated, engineer installed connection
- Unlimited usage, no data transfer limit
- Voice ready MPLS network
- Very high availability
- No port blocking
- No proxy servers

Key benefits

- Less sharing with other users
- Always on, high speed synchronous access
- A voice quality, business grade service
- Ideal for VPN usage and multiple sites
- Fast speeds for files, data and video
- Improved efficiency due to the speed of service
- Increased productivity due to the speed of service
- Effective home working due to upload speeds
- Service guarantees
